

Chapter 8. State Indicators

8-36 Social Scientists as a Percentage of All Occupations

Description

This indicator represents the percentage of social scientists in a state's workforce. Social scientists are identified from standard occupational codes that include economists; survey researchers; clinical, counseling, and school psychologists; industrial-organizational psychologists; psychologists, all other; sociologists; urban and regional planners; anthropologists and archeologists; geographers; political scientists; social scientists and related workers, all other; social science research assistants; anthropology and archeology teachers, postsecondary; economics teachers, postsecondary; geography teachers, postsecondary; political science teachers, postsecondary; psychology teachers, postsecondary; sociology teachers, postsecondary; and social sciences teachers, postsecondary, all other.

Data on individuals in S&E occupations and total occupations come from a survey of workplaces that assigns workers to a state based on where they work. Estimates are developed by the Bureau of Labor Statistics from data provided by state workforce agencies and do not include self-employed persons.

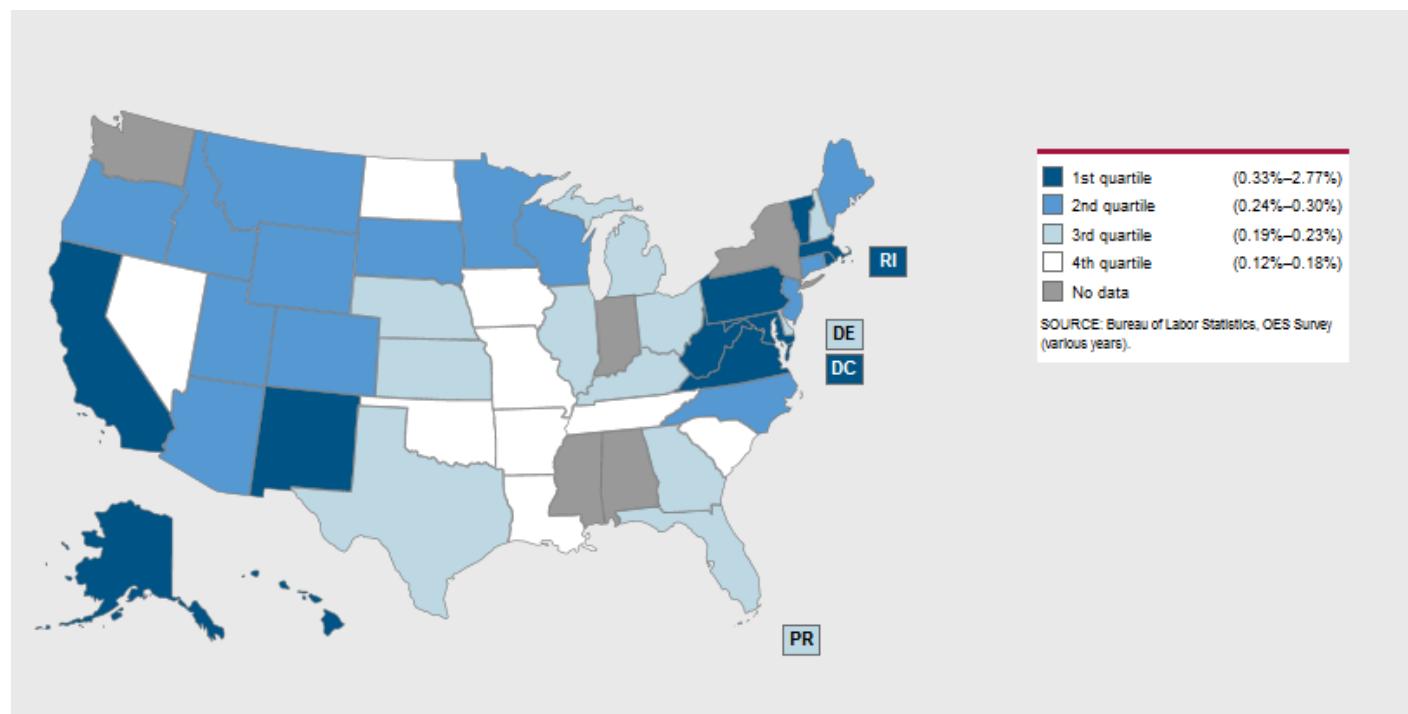

Estimates for states with smaller populations are generally less precise than estimates for states with larger populations.

Findings

- About 371,000 individuals were employed as social scientists in the United States in 2014, a decrease of 25% from the approximately 497,000 social scientists employed in 2004.
- The percentage of social scientists as a share of all occupations decreased from 0.39% in 2004 to 0.27% in 2014.
- In 2014, concentrations of social scientists in individual states ranged from 0.12% to 0.49%, reflecting differences in the concentration of jobs across the country.
- Although the percentages of social scientists declined in most states, congruent with the national numbers, percentages increased in the District of Columbia, Hawaii, and West Virginia from 2004 to 2014.

8-36 Social Scientists as a Percentage of All Occupations

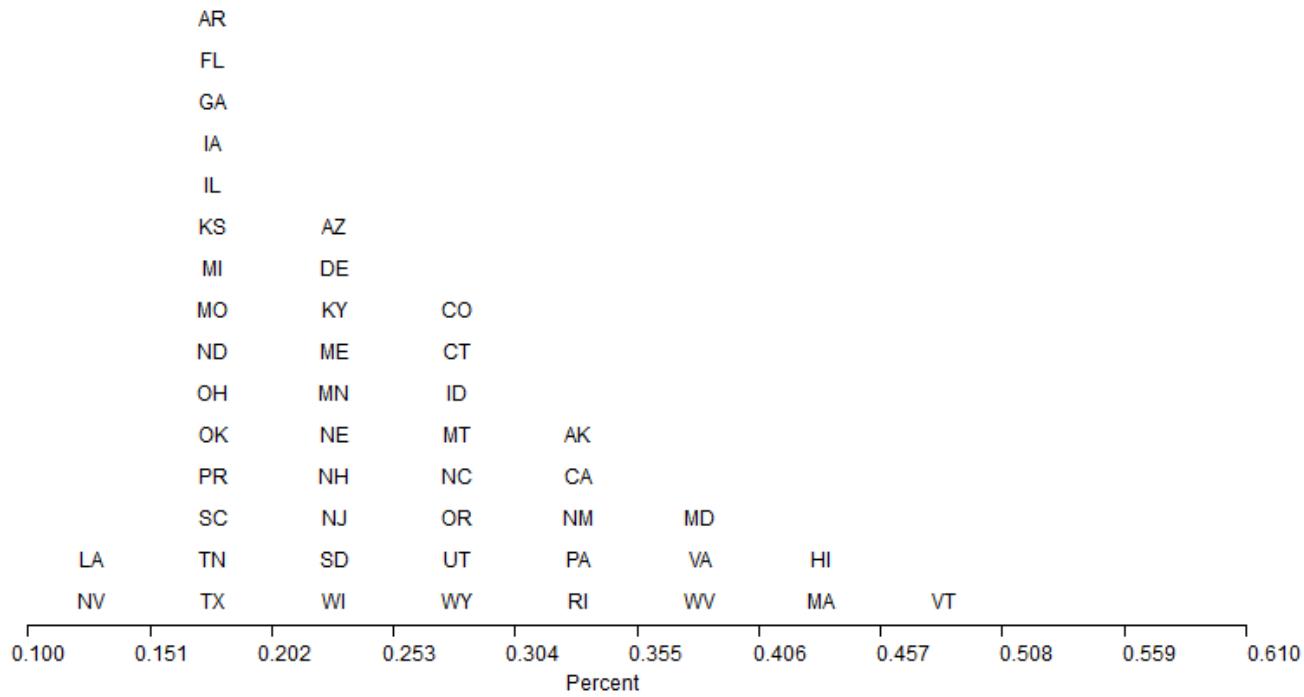

Year: 2014

8-36 Social Scientists as a Percentage of All Occupations

Year: 2014

Distribution of states across indicator values

Histograms do not display states with extreme values. Please consult the data tables for exact indicator values for each state.
